IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments / accessories specified by the manufacturer.
12. Unplug this apparatus during lightning storms or when unused for long periods of time.
13. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
14. This appliance shall not be exposed to dripping or splashing water and that no object filled with liquids such as vases shall be placed on the apparatus.

Welcome to the world of Hello Kitty.

The Sure-Alarm battery back-up system will remember the time and alarm settings of course, but it can do more than that. As long as there is a fresh 9 - volt battery installed, the Sure-Alarm system will operate the radio or buzzer alarm to wake you up even if the power is off at your normal wake up time.

We have taken great care to make sure that your Clock Radio was in perfect working order when it left our factory. It has been designed to give you many years of enjoyment and trouble free operation. Read this manual before operating this unit to become familiar with its features and obtain the performance that will bring you continued enjoyment for many years.

For future reference, record the serial number in the space provided.

Model : KT2056

Serial Number : _____

IMPORTANT NOTES

Avoid installing the unit in locations described below :

- Places exposed to direct sunlight or close to heat radiation appliances such as electric heaters.
- Dusty places.
- Places subject to constant vibration.
- Humid or moist places.

POWER SOURCE

This radio is designed to operate on normal 120V 60Hz AC power only. Do not attempt to operate the radio on any other power source. You could cause damage to the radio that is not covered by your warranty.

This radio should be connected to an AC outlet that is always 'live'. Do not connect it to an outlet that is controlled by a wall switch. When the power to the radio is interrupted, the Sure Alarm battery back up system takes over to maintain the time and alarm settings. To maximize the life of the back up battery, keep the radio connected to a 'live' AC outlet at all times.

This radio uses a polarized AC plug which has one blade wider than the other. This plug will only fit into a polarized AC outlet. This is a safety feature. If the plug will not fit, you may have an older non-polarized AC outlet. Do not defeat the safety feature by trying to file the wider blade, or replacing the plug. Contact an electrician to replace your outdated outlet.

PREPARATION FOR USE

UNPACKING AND SET UP

- Remove the clock radio from the carton and remove all packing material from the clock radio. We suggest that you save the packing material, in the unlikely event that your radio ever needs to be returned for service. The original carton and packing material is the only safe way to pack your radio to protect it from damage in transit.
- Remove any descriptive labels or stickers on the front or top of the cabinet. Do not remove any labels or stickers from the back or bottom of the cabinet.
- Note the serial number on the bottom of your radio and write this number in the space provided on Page 2 of this manual.
- Place your clock radio on a level surface such as a table, desk or shelf, convenient to an AC outlet, out of direct sunlight, and away from sources of excess heat, dirt, dust, moisture, humidity, or vibration.
- Unwind the AC power cord and extend it to its full length. The FM antenna is built in to this cord. It must be fully extended to provide the best FM reception.

SURE-ALARM BATTERY BACK UP SYSTEM

The Sure-Alarm battery back up system in this clock radio will maintain the time and alarm settings in the event of a temporary power interruption. When the AC power is restored the time and alarm settings will be correct. If the AC power is off at your wake up time, the Sure-Alarm system will use the battery power to turn on the radio or buzzer alarm as usual, as long as the back up battery is installed and has sufficient power remaining.

The Sure-Alarm battery back up system requires one 9-volt battery, not included. We recommend that you install an alkaline battery for longest life and best performance.

To install the battery :

- Open the battery compartment cover on the bottom of the radio by pressing the tab in the direction of the arrow.

- Connect the 9-volt battery to the battery clip. It can only be connected one way.

- Push the battery into the battery compartment and replace the cover.

POWER FAILURE INDICATOR

If no battery is installed in the radio, or if the battery in the compartment is weak or dead, the time and alarm settings will be lost if the power is interrupted. When the AC power is restored the clock display will begin flashing. This indicates that the time display is incorrect and needs to be reset.

IMPORTANT :

After you reset the time, be sure to reset your alarm settings as well.

LOCATION OF CONTROLS AND INDICATORS

- | | |
|---|--|
| 1. ALARM Selector Switch.
(BUZZER/AUTO/ON/OFF) | 9. TUNING Control. |
| 2. TIME Button. | 10. SLEEP Button. |
| 3. BAND (AM/FM) Selector Switch. | 11. ALARM Button. |
| 4. MIN. (Minute) Button. | 12. PM Indicator. |
| 5. HOUR Button. | 13. ALM (Alarm) 'On' Indicator. |
| 6. Speaker. (At rear cabinet) | 14. Time LED Display. |
| 7. VOLUME Control. | 15. AC Power Cord. |
| 8. SNOOZE Button. | 16. Battery Compartment.
(At bottom of cabinet) |

OPERATING INSTRUCTIONS

SETTING THE CLOCK

When you connect the radio to your AC outlet for the first time, the clock display will begin flashing "12:00". The flashing will stop when you set the time.

1. Depress the TIME button and the HOUR button to set the correct Hour.
2. Depress the TIME button and the MIN button to set the correct Minute.

NOTE : Be sure to observe the PM indicator to make sure that the time is set correctly for AM or PM. If the PM indicator is 'On', the time displayed is "PM". If the PM indicator is 'Off', the time display is "AM".

SETTING THE WAKE UP TIMES

1. Depress the ALARM button and the HOUR button to set the correct wake up Hour.
2. Depress the ALARM button and the MIN button to set the correct wake up Minute.

NOTE : Be sure that you have set the wake up time correctly by observing the PM indicator. If the PM indicator is 'On', the wake up time is "PM". If the PM indicator is 'Off', the wake up time is "AM".

CHECKING THE WAKE UP TIMES

Whenever you want to check the wake up time, simply press ALARM button. The display will change from the correct time to the wake up time. Release the ALARM button to return to the correct time.

LISTENING TO THE RADIO

1. Set the BAND selector to the desired band, AM or FM.
2. Set the VOLUME control to a low setting.
3. Slide the ALARM switch to the ON position.
4. Select your desired station with the TUNING control.
5. Adjust the VOLUME control to a desired setting.
6. When you finished listening, slide the ALARM selector to the OFF position to turn the radio 'Off'.

ANTENNA INFORMATION

AM - The AM bar antenna is inside the cabinet. If the AM reception is weak, change the position of the cabinet until the internal antenna picks up the strongest signal

FM - The FM antenna is built-in to the AC power cord. If the FM reception is weak try varying the position and direction of the power cord until you find the strongest signal.

WAKE TO RADIO

1. Slide the ALARM selector to the ON position and select the band, station, and volume level that you wish to hear when the alarm comes 'On', then slide the ALARM selector to the AUTO position and the ALM indicator will light up.
2. Reconfirm the wake up time settings by pressing the ALARM button.
3. The radio will turn 'On' at the selected wake up time. It will play for about two hours and then shut off automatically.
4. To stop the radio sooner, press the ALARM button. The radio will stop but the alarm remains set and will turn the radio on again at the same time on the following day.
5. If you do not want the alarm to turn the radio on on the following day, set the ALARM selector to the 'OFF' position.

WAKE TO BUZZER

1. Set the ALARM selector to the BUZZER position. The ALM indicator will light up to confirm that the alarm is set.
2. The buzzer will sound at the selected wake up time . It will continue for about two hours and then shut off automatically.
3. To stop the buzzer sooner, press the ALARM button. The buzzer will stop but the alarm remains set and will turn the buzzer on again at the same time on the following day.
4. If you do not want the alarm to turn the buzzer on on the following day, set the ALARM selector to the 'OFF' position.

SNOOZE ALARM

When the radio or buzzer alarm sounds in the morning, you may press the SNOOZE button for a few more minutes sleep. The alarm will stop for approximately 9 minutes and then turn on again.

SLEEP TO MUSIC TIMER

You can program the sleep timer to play the radio for up to 1 hour 59 minutes and then shut off automatically.

1. Slide the ALARM selector to either "OFF", "BUZZER" or " AUTO" position.
2. Press the SLEEP button, the display will briefly show "0:59". While holding the SLEEP button, press the HOUR button, the display shows "1:59" and the radio will begin to play. After 1 hour 59 minutes the radio will shut off automatically.
3. To adjust the amount of time that the radio will play before shutting off, hold the SLEEP button, then press the MIN (Minute) button or HOUR button to adjust the desired sleep time.
4. To cancel the sleep timer before it counts down to "00" and shuts the radio "off", press the SNOOZE button.

IMPORTANT:

Remember that the station and volume settings you choose for the Sleep To Music operation are the same settings as you will hear if you set the alarm for wake to radio in the following morning.

CARE AND MAINTENANCE

There are no user serviceable parts inside this clock radio. Please refer all service problems to a qualified service facility. See the attached warranty card for further details.

If the cabinet becomes dusty, wipe the exterior with a soft dust cloth only. Never use dusting sprays or polishes on the cabinet.

If the cabinet becomes dirty or smudged with fingerprints it may be wiped with a soft cloth that has been slightly dampened with a mild soap and water solution. Always disconnect the power cord from the AC outlet before cleaning, and never allow any liquid to get inside the cabinet.

NOTE : If there is no battery in the back-up battery compartment, the Time and Alarm settings will be lost when the AC power cord is disconnect for cleaning. Reset the clock and wake up time after reconnecting the AC power cord.

COMPLIANCE WITH FCC REGULATIONS

This equipment has been tested and found to comply with the limits for a Radio Receiver, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio technician for help.

SERVICE

Please refer to the instructions on the enclosed warranty card for returning your unit for service. When returning the unit, please remove batteries to prevent damage to the unit in transit and/or from possible battery leakage. We are not responsible for batteries returned with the product or for the cost of replacement.
